(54) Title (EN): DRYING DEVICE WITH IMPROVED DRIVE MECHANISM

(54) Title (FR): DISPOSITIF DE SÉCHAGE DOTÉ D'UN MÉCANISME D'ENTRAÎNEMENT AMÉLIORÉ

(57) Abstract:

(EN): A drying device having a bowl, a basket with a plurality of perforations, a cover assembly, and a drive assembly. The drive assembly includes: a driving mechanism mechanically coupled to a rotatable lid that is configured to mate with a rotatable basket, and a handle pivotally attached to the cover assembly. The handle is configured to actuate the driving mechanism upon rotation of the handle about an axis from a first position to a second position. The drying device may also include a locking mechanism and/or a braking mechanism.

(FR): La présente invention concerne un dispositif de séchage présentant une cuve, un panier doté d'une pluralité de perforations, un ensemble formant capot, et un ensemble d'entraînement. L'ensemble d'entraînement comprend : un mécanisme d'entraînement couplé de manière mécanique à un couvercle rotatif qui est configuré pour s'associer à un panier rotatif, et une poignée fixée de manière pivotante à l'ensemble formant capot. La poignée est configurée pour actionner le mécanisme d'entraînement suite à la

rotation de la poignée autour d'un axe d'une première position à une seconde position. Le dispositif de séchage peut également comprendre un mécanisme de verrouillage et/ou un mécanisme de freinage.
