(54) Title (EN): SUBSCRIPTION MANAGEMENT

(54) Title (FR): GESTION D'ABONNEMENT

(57) Abstract:

(EN): A security element (10) of a mobile device (100) comprises a service-provider network subscription (50) associated with a service provider (300). The security element (10) is arranged such that the service-provider subscription (50) is employable parallel to a user network subscription (40) installed on the security element (10). A service (200) associated with the service provider (300) thus becomes utilizable on the basis of the service-provider subscription (50), independently of a user subscription (40) that might be present on the same security element (10).

(FR): La présente invention concerne un élément de sécurité (10) d'un dispositif mobile (100) comportant un abonnement de réseau de fournisseur de services (50) associé à un fournisseur de services (300). L'élément de sécurité (10) est agencé de sorte que l'abonnement du fournisseur de services (50) puisse être utilisé parallèlement à un abonnement de réseau utilisateur (40) installé sur l'élément de sécurité (10). Un service (200) associé au fournisseur de services (300) devient ainsi utilisable sur la base de l'abonnement du fournisseur de services (50), indépendamment d'un abonnement d'utilisateur (40) qui pourrait être présent sur le même élément de sécurité (10).
