(54) Title (EN): AEROSOL-GENERATING ARTICLE WITH IMPROVED OUTERMOST WRAPPER

(54) Title (FR): ARTICLE DE GÉNÉRATION D'AÉROSOL AVEC ENVELOPPE EXTÉRIEURE AMÉLIORÉE

(57) Abstract:

(EN): An aerosol-generating article (2) comprises: an aerosol-forming substrate (10); and an outermost wrapper (20) around at least a portion of the aerosol-forming substrate, wherein an outer surface of the outermost wrapper forms at least part of an outer surface of the aerosol-generating article. The outermost wrapper comprises a metallised substrate comprising a substrate layer and a metal layer radially outward of the substrate layer, the metal layer having a thickness of less than or equal to about 100 nanometres.

(FR): La présente invention concerne un article de génération d'aérosol (2) qui comprend : un substrat de formation d'aérosol (10) ; et une enveloppe extérieure (20) autour d'au moins une partie du substrat de formation d'aérosol, une surface externe de l'enveloppe extérieure formant au moins une partie d'une surface externe de l'article de génération d'aérosol. L'enveloppe extérieure comprend un substrat métallisé comprenant une couche de substrat et une couche métallique radialement vers l'extérieur de la couche de substrat, la couche de métal ayant une épaisseur inférieure ou égale à environ 100 nanomètres.
