(57) Abstract:

(EN): A molecular marker, a kit using same, and an application thereof. The molecular marker is used for early diagnosis and prediction of sepsis complicated by acute kidney injury. The molecular marker in the blood of patients with sepsis complicated by acute kidney injury is highly expressed. Detecting expression levels of the molecular marker in the blood of a patient helps to determine whether the patient suffers from sepsis complicated by acute kidney injury or the probability of suffering from sepsis complicated by acute kidney injury.

(FR): La présente invention concerne un marqueur moléculaire, un kit l'utilisant et une application associée. Le marqueur moléculaire est utilisé pour un diagnostic précoce et une prédiction de septicémie compliquée par une lésion rénale aiguë. Le marqueur moléculaire dans le sang de patients présentant une septicémie compliquée par une lésion rénale aiguë est hautement exprimé. La détection des niveaux d'expression du marqueur moléculaire dans le sang d'un patient aide à déterminer si le patient souffre d'une septicémie compliquée par une lésion rénale aiguë ou la probabilité de souffrir d'une septicémie compliquée par une lésion rénale aiguë.

(ZH): 一种分子标记物、试剂盒及应用,该分子标记物用于早期诊断、预测脓毒血症并发急性肾损伤;脓毒血症并发急性肾损伤患者血液中的上述分子标记物呈高表达,通过检测患者血液中上述分子标记物的表达水平,可以判断患者是否患有脓毒血症急性肾损伤或患脓毒血症急性肾损伤的概率。
