(54) Title (EN): MULTIPLE PROJECT VISUALIZATION TOOL

(54) Title (FR): OUTIL DE VISUALISATION DE PROJETS MULTIPLES

(57) Abstract:

(EN): A method of visualising project management information deriving from a plurality of mutually incompatible project management computer programs is presented. The method comprises the steps of obtaining first project data (8) in a first data format (4) generated by a first project management computer program, and obtaining second project data (11) in a second data format (7) generated by a second project management computer program. The first project data and second project data are deciphered and simultaneously visualised in a single graphical user interface (1) of a project management computer program. The first data format is incompatible with the second project management computer program and the second data format is incompatible with the first project management computer program.

(FR): L'invention concerne un procédé de visualisation d'informations de gestion de projets issus d'une pluralité de programmes informatiques mutuellement incompatibles de gestion de projets. Le procédé comporte les étapes consistant à obtenir des premières données (8) de projet dans un premier format (4) de données générées par un premier programme informatique de gestion de projets, et à obtenir des secondes données (11) de projet dans un second format (7) de données générées par un second programme informatique de gestion de projets. Les premières données de projet et les secondes données de projet sont déchiffrées et simultanément visualisées dans une seule interface graphique (1) d'utilisateur d'un programme informatique de gestion de projets. Le premier format de données est incompatible avec le second programme informatique de gestion de projets et le second format de données est incompatible avec le premier programme informatique de gestion de projets.
