(54) Title (EN): PRIMING COSMETIC COMPOSITION AND PREPARING METHOD THEREFOR

(54) Title (FR): COMPOSITION COSMÉTIQUE D'AMORÇAGE ET SON PROCÉDÉ DE PRÉPARATION

(54) Title (KO): 프라이밍 화장품 조성물 및 이의 제조방법

(57) Abstract:

(EN): The present specification discloses a priming cosmetic composition and a preparing method therefor. In an embodiment, a cosmetic composition of the present invention, which is a P/O/W type emulsion containing an inner phase, a surfactant, an oil phase, and an outer water phase, is prepared by utilizing a lipophilic surfactant having high interaction with the oil phase. Therefore, water, which accounts for most of the composition, quickly evaporates, and thus a user can feel a moist application, and through sweat and sebum control by a powder into which the oil phase is adsorbed, a user can feel a soft and dry finish. In addition, the cosmetic agent of the present invention also shows a waterproof effect. Therefore, in an embodiment, the sustainability of makeup can be improved by using the cosmetic composition of the present invention before application of real base makeup, and thus the composition of the present invention can be variously utilized as an independent cosmetic formulation.

(FR): La présente invention concerne une composition cosmétique d'amorçage et son procédé de préparation. Dans un mode de réalisation, une composition cosmétique de la présente invention, qui est une émulsion de type P/H/E (Polyol/Huile/Eau) contenant une phase interne, un tensioactif, une phase huileuse et une phase aqueuse externe, est préparée en utilisant un tensioactif lipophile ayant une interaction élevée avec la phase huileuse. Par conséquent, l'eau, qui représente la plupart de la composition, s'évapore rapidement, et ainsi un utilisateur peut ressentir une application humide, et par la transpiration et la régulation du sébum par une poudre dans laquelle la phase huileuse est adsorbée, un utilisateur peut ressentir un fini doux et sec. De plus, l'agent cosmétique de la présente invention présente également un effet étanche à l'eau. Par conséquent, dans un mode de réalisation, la durabilité du maquillage peut être améliorée en utilisant la composition cosmétique de la présente invention avant l'application d'un maquillage de base réel, et ainsi la composition de la présente invention peut être utilisée de diverses manières en tant que formulation cosmétique indépendante.

(KO): 본 명세서는 프라이밍 화장품 조성물 및 이의 제조방법을 개시한다. 일 구현예로 내상, 계면활성제, 유상 및 외수상을 포함하는 P/O/W형 에멀전인 본 발명의 화장품 조성물은 유상과의 상호작용이 높은 친유성 계면활성제를 활용하여 제조되는 것을 특징으로 한다. 이에 따라, 조성물의 대부분은 차지하는 물이 빠르게 증발하면서 촉촉한 발림감을 느낄 수 있고, 동시에 유상이 흡착된 파우더에 의하여 땀 또는 피지 조절을 통한 보송한 마무리감을 느낄 수 있다. 아울러, 본 발명의 화장품은 워터프루프 효과도 함께 나타내는 것이 특징이다. 따라서, 일 구현예로서 본격적인 베이스 메이크업을 하

기 전에 본 발명의 화장료 조성물을 사용하여 메이크업의 지속력을 높여줄 수 있는 바, 본 발명의 조성물은 독자적인 화장료 제형으로서 다양하게 활용될 수 있다는 이점이 있다.
