(54) Title (EN): QUICK BURST TUNEAWAY

(54) Title (FR): DÉTACHEMENT À RAFALES RAPIDES

(57) Abstract:
(EN): A method, a computer-readable medium, and an apparatus may be a User Equipment (UE) having a first subscription to a first RAT and a second subscription to a second RAT configured to operate using the first RAT, to change from operating using the first RAT to operating using the second RAT to monitor multiple Synchronization Signal Blocks (SSBs) at multiple times prior to performing at least one of decoding a paging message, receiving system information, searching a neighboring frequency, or measuring the neighboring frequency, to return to using the first RAT during a first period between at least one set of adjacent times of the multiple times that the UE monitors for the SSBs, and to change from using the first RAT to using the second RAT to receive the paging message, receive the system information, search the neighboring frequency, or measure the neighboring frequency.

(FR): L'invention concerne un procédé, un support lisible par ordinateur et un appareil pouvant être un équipement utilisateur (UE) ayant un premier abonnement à une première RAT et un deuxième abonnement à une deuxième RAT configuré pour fonctionner en utilisant la première RAT, pour passer du fonctionnement en utilisant la première RAT au fonctionnement en utilisant la deuxième RAT pour surveiller la présence de multiples blocs de signal de synchronisation (SSB) à de multiples instants avant la réalisation d'au moins une opération parmi le décodage d'un message de radiomessagerie, la réception d'informations de système, la recherche d'une fréquence voisine, ou la mesure de la fréquence voisine, pour retourner à l'utilisation de la première

RAT pendant une première période entre au moins un ensemble d'instants adjacents des multiples instants où l'UE surveille la présence des SSB, et pour passer de l'utilisation de la première RAT à l'utilisation de la deuxième RAT pour recevoir le message de radiomessagerie, recevoir les informations de système, rechercher la fréquence voisine ou mesurer la fréquence voisine.
