(54) Title (EN): CONTROLLING THE HANDLING OF COMMUNICATION SESSIONS

(54) Title (FR): COMMANDE DE LA GESTION DE SESSIONS DE COMMUNICATION

(57) Abstract:

(EN): There is provided a method of operating an application server of a network for controlling handling of a communication session. The method comprises generating (100) a script executable by a first user equipment, where execution of the script at the first user equipment controls handling of a communication session between the first user equipment and a second user equipment. The method comprises transmitting (102) an establishment request to the first user equipment for the establishment of the communication session between the first user equipment and the second user equipment. The establishment request comprises the script for execution at the first user equipment.

(FR): L'invention concerne un procédé de fonctionnement d'un serveur d'applications d'un réseau, ledit procédé permettant de commander la gestion d'une session de communication. Le procédé consiste à : générer (100) un script exécutable par un premier équipement utilisateur, l'exécution du script au niveau du premier équipement utilisateur commandant la gestion d'une session de communication entre le premier équipement utilisateur et un second équipement utilisateur ; et transmettre (102) au premier équipement utilisateur une demande d'établissement visant à l'établissement de la session de communication entre les premier et second équipements utilisateur. La demande d'établissement contient le script destiné à une exécution au niveau du premier équipement utilisateur.
