**(54) Title (EN):** FOODSTUFF PREPARATION DEVICE

**(54) Title (FR):** DISPOSITIF DE PRÉPARATION POUR DENRÉES ALIMENTAIRES

**(57) Abstract:**

**(EN):** A foodstuff preparation device may include a roasting chamber having a roasting cavity and a heating element that may be configured to govern the temperature of the roasting cavity. A funnel may be configured for communicating a foodstuff, having a pre-ground particle size, from the roasting chamber to between two or more grinding stones, such as a first grinding stone and a second grinding stone. A grinding motor may be configured to motivate the foodstuff between the two or more grinding stone so that the foodstuff exits from between a first grinding stone and second grinding stone with a first ground particle size, the first ground particle size smaller than the pre-ground particle size. Generally, the device may be configured to prepare foodstuffs, such as sesame seeds, by roasting and 0 grinding them to produce Tahini, or any other similar prepared food.

**(FR):** Un dispositif de préparation pour denrées alimentaires peut comprendre une chambre de torréfaction ayant une cavité de torréfaction et un élément chauffant qui peut être configuré pour commander la température de la cavité de torréfaction. Un entonnoir peut être configuré pour faire passer une denrée alimentaire, ayant une taille de particule pré-moulue, de la chambre de torréfaction à entre au moins deux pierres à moudre, telles qu'une première pierre à moudre et une seconde pierre à moudre. Un moteur de mouture peut être configuré pour entraîner la denrée alimentaire entre au moins deux pierres à moudre de telle sorte que la denrée alimentaire sorte d'entre une première pierre à moudre et une seconde pierre à moudre avec une première taille de particule moulue, la première taille de particule moulue étant plus petite que la taille de particule pré-moulue. D'une manière générale, le dispositif peut être configuré pour préparer des denrées alimentaires, telles que des graines de sésame, par torréfaction et mouture de celles-ci pour produire du tahini, ou tout autre aliment préparé similaire.
