(54) Title (EN): ELECTROSURGICAL ELECTRODES AND SYSTEMS AND METHODS INCLUDING SAME

(54) Title (FR): ÉLECTRODES ÉLECTROCHIRURGICALES ET SYSTÈMES ET PROCÉDÉS LES COMPRENANT

(57) Abstract:

(EN): A method for treating tissue of a subject includes: providing an electrode having a contact surface, optionally wherein the contact surface has a curved profile; placing the contact surface in contact with tissue of the subject; and sliding the contact surface across and in contact with the tissue while applying electrosurgical currents to the tissue via the contact surface to thereby vaporize and ablate the tissue and form a treated area of the tissue.

(FR): L'invention concerne un procédé de traitement de tissu d'un patient, comprenant : de fournir une électrode ayant une surface de contact, la surface de contact ayant facultativement un profil incurvé ; de placer la surface de contact en contact avec un tissu du patient ; et de faire coulisser la surface de contact à travers le tissu et en contact avec celui-ci tout en appliquant des courants électrochirurgicaux au tissu par l'intermédiaire de la surface de contact, pour ainsi vaporiser et ablater le tissu et former une zone traitée du tissu.
