

# (12) International Application Status Report

**Received at International Bureau:** 08 April 2020 (08.04.2020)

**Information valid as of:** 14 September 2020 (14.09.2020)

**Report generated on:** 17 January 2021 (17.01.2021)

**(10) Publication number:**

WO2020/193626

**(43) Publication date:**

01 October 2020 (01.10.2020)

**(26) Publication language:**

English (EN)

**(21) Application Number:**

PCT/EP2020/058351

**(22) Filing Date:**

25 March 2020 (25.03.2020)

**(25) Filing language:**

English (EN)

**(31) Priority number(s):**

62/825118 (US)

**(31) Priority date(s):**

28 March 2019 (28.03.2019)

**(31) Priority status:**

Priority document received (in compliance with PCT Rule 17.1)

**(51) International Patent Classification:**

*H04W 36/08* (2009.01); *H04W 36/36* (2009.01)

**(71) Applicant(s):**

TELEFONAKTIEBOLAGET LM ERICSSON (PUBL) [SE/SE]; SE-164 83 Stockholm (SE) *(for all designated states)*

**(72) Inventor(s):**

**(54) Title (EN):** OPTIONAL SENDING OF COMPLETE MESSAGE IN CONDITIONAL HANDOVER

**(54) Title (FR):** ENVOI OPTIONNEL D'UN MESSAGE COMPLET DANS UN TRANSFERT CONDITIONNEL

**(57) Abstract:**

**(EN):** The invention refers to a method, in a wireless device operating in a wireless communication network, the method comprising: receiving, from a source node, a conditional handover command, the conditional handover command including or being associated with a triggering condition for execution of handover to a target cell or target beam; detecting, that the triggering condition is met; if a conditional handover configuration is not yet completed, executing the handover to the target cell or beam without sending a message confirming completion of a conditional handover configuration to the source node, and otherwise sending the message confirming completion of the conditional handover configuration to the source node; the invention further relates to a corresponding wireless device.

**(FR):** L'invention concerne un procédé exécuté dans un dispositif sans fil fonctionnant dans un réseau de communication sans fil. Le procédé consiste à : recevoir, en provenance d'un nœud source, une commande de transfert conditionnel, la commande de transfert conditionnel comprenant ou étant associée à une condition de déclenchement pour l'exécution d'un transfert vers une cellule cible ou un faisceau cible ; détecter que la condition de déclenchement est satisfaite ; si une configuration de transfert conditionnel n'est pas encore achevée, exécuter le transfert vers la cellule ou le faisceau cible sans envoyer au nœud source un message confirmant l'achèvement d'une configuration de transfert conditionnel, et sinon envoyer au nœud source le message confirmant l'achèvement de la configuration de transfert conditionnel. L'invention concerne en outre un dispositif sans fil correspondant.
