(54) Title (EN): CURABLE COMPOSITION, CURED MATERIAL, AND METHOD FOR FORMING CURED MATERIAL

(54) Title (FR): COMPOSITION DURCISSABLE, MATÉRIAU DURCI ET PROCÉDÉ DE FORMATION D'UN MATÉRIAU DURCI

(54) Title (JA): 硬化性組成物、硬化物、及び硬化物の形成方法

(57) Abstract:
(EN): Provided are a cationically-curable curable composition in which suppression of discoloration of a cured material during curing and good curability can both be obtained at the same time, a cured material of the curable composition, and a method for forming a cured material using the curable composition. A curable composition including a cationic curing agent (A) and a cationically curable compound (B), wherein the cationic curing agent used includes a combination of a photoacid generator (A1) comprising an onium salt having a cation portion that has a specific structure, and a thermal acid generator (A2) having as an anion portion a gallium-containing anion that has a specific structure.

(FR): L'invention concerne une composition durcissable par voie cationique dans laquelle la suppression de la décoloration d'un matériau durci pendant le durcissement et une bonne aptitude au durcissement peuvent toutes deux être obtenues en même temps, un matériau durci obtenu à partir de ladite composition durcissable, et un procédé de formation d'un matériau durci mettant en oeuvre ladite composition durcissable. L'invention concerne également une composition durcissable comprenant un agent de durcissement cationique (A) et un composé durcissable par voie cationique (B), l'agent de durcissement cationique utilisé comprenant une association d'un générateur de photoacide (A1) comprenant un sel d'onium ayant une partie cationique qui possède une structure spécifique, et d'un générateur d'acide thermique (A2) ayant comme partie anionique un anion contenant du gallium qui possède une structure spécifique.

(JA): 硬化時の硬化物の着色の抑制と、良好な硬化性とを両立できるカチオン硬化性の硬化性組成物と、当該硬化性組成物の硬化物と、当該硬化性組成物を用いる硬化物の形成方法とを提供すること。 カチオン硬化剤(Ａ)と、カチオ

ン硬化性化合物(Ｂ)とを含む硬化性組成物において、特定の構造のカチオン部を有するオニウム塩からなる光酸発生剤(Ａ１)と、特定の構造の含ガリウムアニオンをアニオン部として有する熱酸発生剤(Ａ２)とを組み合わせて含むカチオン硬化剤を用いる。
