(54) Title: CONCEPT MAPPING BASED KNOWLEDGE ACQUISITION SYSTEM AND METHODS

(57) Abstract: An artificial intelligent system for building and processing a knowledge base comprising a presentation layer for providing desired contexts, a mapping engine for linking the contexts to databases that store numerous documents from various sources (Figure 2). The intelligent system also provides a framework for using the knowledge base build competency in diverse specialities (Figure 7).

INTERNATIONAL SEARCH REPORT

International application No.

PCT/US01/11521

BOX II. OBSERVATIONS WHERE UNITY OF INVENTION IS LACKING This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid.

Group I, claim(s) 1-10, drawn to a knowledge processing system.

Group II, claim(s) 11-24, drawn to a specific system for managerial understanding

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The invention claimed in Group I deals with the construction of a knowledge base wherein the invention in Group II deals with a specific implementation of such a knowledge base
