Re Item V.

1 Reference is made to the following documents:

D1 : US 2005/262429 A1 (ELDER ET AL.) 24 November 2005 (2005-11-24)

2 INDEPENDENT CLAIM 1

2.1 The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT.

Document D1 discloses (the references in parentheses applying to this document):

an electronic forms management system comprising

at least one publishing unit (see par. [0048], "forms manager (36) that enables the design of forms", and figure 3) being adapted to publish form templates to a server (application server 26)

at least one data unit (electronic clipboard 10) connected to the server and being adapted to receive input data and

the server being adapted to process the published form templates and the input data (see para [0023]), wherein the server comprises an Intelligent Character Recognition framework being adapted to receive at least one ICR engine for receiving the input data (see para [0099], which discloses user-specific ICR engines)

2.2 D1 thus disclosing all the features of independent claim 1, it follows that the subject matter of claim 1 is not new.

3 INDEPENDENT CLAIM 18

3.1 Independent claim 18 describes an apparatus substantially corresponding to the system described in claim 1, and so the objections in 2.1 above apply mutatis mutandis.

4 DEPENDENT CLAIMS 2-17, 19-26

Dependent claims 2-17, 19-26 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty and/or inventive step (Article 33(2) and (3) PCT), as all the additional features of the dependent claims are either disclosed (explicitly or implicitly) in D1 or would be obvious in the light of D1 and the common general knowledge of the skilled person.
