1. This opinion contains indications relating to the following items:

- Box No. I Basis of the opinion
- Box No. II Priority
- Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- Box No. IV Lack of unity of invention
- Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- Box No. VI Certain documents cited
- Box No. VII Certain defects in the international application
- Box No. VIII Certain observations on the international application

2. **FURTHER ACTION**

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

3. For further details, see notes to Form PCT/ISA/220.

Box No. IV Lack of unity of invention

1. In response to the invitation (Form PCT/ISA/206) to pay additional fees the applicant has, within the applicable time limit:
- paid additional fees
 - paid additional fees under protest and, where applicable, the protest fee
 - paid additional fees under protest but the applicable protest fee was not paid
 - not paid additional fees
2. This Authority found that the requirement of unity of invention is not complied with and chose not to invite the applicant to pay additional fees.
3. This Authority considers that the requirement of unity of invention in accordance with Rule 13.1, 13.2 and 13.3 is
- complied with
 - not complied with for the following reasons:

See Supplemental Box

4. Consequently, this opinion has been established in respect of the following parts of the international application:

International application No.

PCT/EP2007/064047

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

- a cooking device having a cooking container (2), wherein the cooking device has means for carrying out preparation processes of steaming (column 4, lines 1-5), baking (column 4, lines 27-44) and braising (column 4, line 12).

The subject matter of claim 1 is therefore not novel (PCT Article 33(1) and (2)).

2.2. Document D4 (column 3, lines 31-65 and figures 1-2) discloses (cf. claim 23):

- a cooking device having a cooking container (4) and a heating element (14), wherein the base (10) of the cooking container comprises at least one composite sheet (6, 8) which has a heating element (14) arranged on its lower face.

The subject matter of claim 23 is therefore not novel (PCT Article 33(1) and 33(2)).

3. Dependent claims 2-4 and 24-26 do not appear to contain any additional features which, in combination with the features of claim 1, meet the PCT requirements of novelty and/or inventive step.

4. The combination of features in dependent claims 5-22 and 27 is neither known nor obvious from the available prior art.

Box IV

The definition of various groups of claimed inventions serves only to label these inventions. Therefore, these definitions can contain generalizations which, upon closer examination, go beyond the subject matter of the content of the application as filed.

The patent application lacks unity of invention (PCT Rule 13.1, 13.2, 13.3).

Document D1 (DE4116425) describes a cooking device having all the features of claim 1. Claim 1 therefore does not contain any special technical features as defined in PCT Rule 13.2. Claim 2 likewise does not contain any special technical features.

Group 1:

Claim 3 contains the feature of an outlet opening which can be closed by an outflow stopper. This feature is not disclosed in D1 and is therefore considered to be a special technical feature of the first group. This feature solves the problem of allowing user-friendly cleaning.

Group 2:

Claim 5 and claim 23 contain the feature of a composite sheet. This feature is not disclosed in D1 and is therefore considered to be a special technical feature of the second group. This feature solves the problem of

Supplemental Box

improving the distribution of heat for preparing the product being cooked.

Group 3:

Claim 17 contains the feature of a first subregion (for steam generation) which is arranged below the second subregion (for baking). This feature is not disclosed in D1 and is therefore considered to be a special technical feature of the third group. This feature solves the problem of a stackable design.

On account of this conclusion, groups 1-3 are based, in the opinion of the Examination Division, on different solutions to different technical problems which can be used independently of one another: the substantive matter of these groups of inventions differs from one another to such an extent that no technical relationship which could form a single general inventive concept can be determined by one or more corresponding technical features.
