1. This opinion contains indications relating to the following items:

- Box No. I Basis of the opinion
- Box No. II Priority
- Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- Box No. IV Lack of unity of invention
- Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- Box No. VI Certain documents cited
- Box No. VII Certain defects in the international application
- Box No. VIII Certain observations on the international application

2. **FURTHER ACTION**

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

medium is also conventionally a well-known art without citing any example.

Claim 8

The invention as in claim 8 does not involve an inventive step in the light of document 1 cited in the ISR and the well-known art.

Document 1 describes a maintenance device 4 wherein when an alarm (emergent monitoring information) is raised, alarm information and past data (general monitoring information) are attached to the text of an e-mail and then the e-mail is transmitted.

In addition, recording a control program on a recording medium is also conventionally a well-known art without citing any example.

Claim 10

The invention as in claim 10 does not involve an inventive step in the light of documents 1 and 3 cited in the ISR.

Applying the feature described in document 3, wherein acquired data is sorted in time-stamp order, in the invention described in document 1 would be easy for a person skilled in the art.

In addition, recording a control program on a recording medium is also conventionally a well-known art without citing any example.

Claims 1-6 and 9

The invention as in claims 1-6 and 9 is neither described in any of the documents cited in the ISR nor would it be obvious to a person skilled in the art.
