<p>Reference is made to the following document:</p> <p style="padding-left: 40px;">D1: WO 2006/000355 A (BAYER CROPSCIENCE AG [DE]; FISCHER REINER [DE]; GAERTZEN OLIVER [DE];) 5 January 2006 (2006-01-05) cited in the application</p> <p>Document D1 is considered to be the prior art closest to the subject matter of claims 1-17 and 25-28 and describes compounds of the formula (I) as pesticides and/or herbicides. The difference between the compounds from D1 and the compounds of the present application is that the compounds of the present application are substituted by A and B, where A and B are bonded to the same carbon atom. Therefore, the subject matter of claims 1-17 and 25-28 is novel.</p> <p>The problem addressed was to provide alternative compounds for control of pests. Proceeding from D1, a person skilled in the art would not arrive at the solution of the present application because he does not receive any instruction, either in D1 or in the earlier prior art, to substitute the compounds from D1 with A/B, where A and B are bonded to the same carbon atom.</p>

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

The subject matter of claims 1-17 and 25-28 is therefore considered to be inventive.

Claims 18-24 claim intermediates. These compounds are novel and are also considered to be inventive because they possess the inventive A/B feature.
