Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

Document D3 is considered to be the closest prior art. D3 discloses a cylindrical filter for cheese preparation which does not, however, disclose the scrapers. The object of the present application was to make available a filter for processing paste-type foods, in particular processed cheese. D3 solves a different problem, that is to say separating off the aqueous components during cheese preparation. Therefore, in the prior art there is no indication of using a filter having scraper elements as in the present application for filtering paste-type foods.
