INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference 110518PCT	FOR FURTHER ACTION	see Form PCT/ISA/220 as well as, where applicable, item 5 below.
International application No. PCT/CN2011/073056	International filing date (<i>day/month/year</i>) 20 Apr. 2011(20.04.2011)	(Earliest)Priority date (<i>day/month/year</i>) 22 Dec. 2010(22.12.2010)
Applicant ZTE CORPORATION et al.		

This international search report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This international search report consists of a total of 4 sheets.

It is also accompanied by a copy of each prior art document cited in this report.

1. Basis of the report

a. With regard to the **language**, the international search was carried out on the basis of:

the international application in the language in which it was filed

a translation of the international application into _____, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b))

b. This international search report has been established taking into account the **rectification of an obvious mistake** authorized by or notified to this Authority under Rule 91 (Rule 43.6bis(a)).

c. With regard to any **nucleotide and /or amino acid sequence** disclosed in the international application, see Box No. I.

2. **Certain claims were found unsearchable** (see Box No. II)

3. **Unity of invention is lacking** (see Box No. III)

4. With regard to the **title**,

the text is approved as submitted by the applicant.

the text has been established by this Authority to read as follows:

5. With regard to the **abstract**,

the text is approved as submitted by the applicant.

the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box IV. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.

6. With regard to the **drawings**,

a. The figure of the **drawings** to be published with the abstract is Figure No. 1

as suggested by the applicant

as selected by this Authority, because the applicant failed to suggest a figure

as selected by this Authority, because this figure better characterizes the invention

b. none of the figures is to be published with the abstract

Box No. IV Text of the abstract (Continuation of item 5 of the first sheet)

The present invention discloses a method and a device for improving an access success ratio of a terminal in a mobile communication system. The method includes the following steps: a base station system obtains, according to pilot strength information of each access frequency point, a priority of coverage situation of each access frequency point (103); when the pilot strength of the access frequency point of a subsequent terminal is weaker, an access frequency point is allocated to the terminal according to the priority and load balance situation among frequency points. With the application of the present invention, the terminal can be allocated to the access point, which has a higher pilot strength and satisfies load balance, as much as possible, and the access success ratio of the terminal can be improved, and the situation that the terminal can not access the system or drops words can be avoided as much as possible, and use experience of a terminal user and wireless performance indexes of the mobile communication system are improved.
