   - b. [ ] none of the figures is to be published with the abstract
A method and system for authorising multiple devices (56) and multiple content providers (52) in a content provision system is provided. Each content provider is issued with a content provider authorisation certificate (120). Each user device is issued with a user device authorisation certificate (108), the two certificates for coming from a common source (226). A determination is then made as to whether each content provider and each user device is authorised to participate in the content provision system via a mutual exchange and comparison of the certificates between respective content providers and user devices. Applications (302) may be downloaded from content provider to be executed on the user device. The applications are signed with the content provider certificate (120).
