**Box No. V** Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability;  
citations and explanations supporting such statement

transfer from a hydrogen generator is controlled in such a manner that the operation of feeding a raw material to the hydrogen generator after a halt on the generation of a hydrogen-containing gas in the hydrogen generator is not carried out unless the hydro-desulfurization unit has a temperature at which the deposition of carbon from the raw material is suppressed.

**Box No. VIII**      **Certain observations on the international application**

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Although claim 11 contains the wording the "aforementioned operation", an "operation" corresponding thereto is not written prior to the wording. Thus, the invention as in claim 11 is inconsistent, and therefore is not clear.

In addition, in Box V, the opinion about novelty and an inventive step was established on the assumption that the invention as in claim 11 cites claim 10.
