1. This opinion contains indications relating to the following items:

- Box No. I Basis of the opinion
- Box No. II Priority
- Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- Box No. IV Lack of unity of invention
- Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step and industrial applicability; citations and explanations supporting such statement
- Box No. VI Certain documents cited
- Box No. VII Certain defects in the international application
- Box No. VIII Certain observations on the international application

2. FURTHER ACTION

If a demand for international preliminary examination is made, this opinion will usually be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

Box No. I Basis of the opinion

1. With regard to the **language**, this opinion has been established on the basis of:
 - the international application in the language in which it was filed.
 - a translation of the international application into , which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1 (b)).
2. This opinion has been established taking into account the **rectification of an obvious mistake** authorized by or notified to this Authority under Rule 91 (Rule 43bis.1(a))
3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, this opinion has been established on the basis of a sequence listing:
 - a. forming part of the international application as filed:
 - in the form of an Annex C/ST.25 text file.
 - on paper or in the form of an image file.
 - b. furnished together with the international application under PCT Rule 13ter.1(a) for the purposes of international search only in the form of an Annex C/ST.25 text file.
 - c. furnished subsequent to the international filing date for the purposes of international search only:
 - in the form of an Annex C/ST.25 text file (Rule 13ter.1(a)).
 - on paper or in the form of an image file (Rule 13ter.1(b) and Administrative Instructions, Section 713).
4. In addition, in the case that more than one version or copy of a sequence listing has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that forming part of the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
5. Additional comments:

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Section V

1) Reference is made to the following documents; the numbering will be adhered to in the rest of the procedure.

D1 WO 2006/028958 A2 (GENENTECH INC [US]; CURIS INC [US]; GUNZNER JANET [US]; SUTHERLIN DANI) 16 March 2006 (2006-03-16)

D2 AITIPAMULA, S. ET AL.: "Polymorphs, Salts, and Cocrystals: What`s in a Name ?",
CRYST. GROWTH DES.,
vol. 12, 2012, pages 2147-2152,

2) The present application is directed to multi-component crystals of Vismodegib which is 2-Chloro-N-[4-chloro-3-(2-pyridinyl)phenyl]-4-methylsulfonylbenzamide (RN = 879085-55-9). Claim 1 is directed to co-crystal formers and solvents and dependent claims 2-11 relate to specific multi-component crystals.

3) Claim 1 is not clear (Art. 6 PCT) in view of the expression "co-crystal former" which leaves the skilled person with an undue burden to find out which chemical entities might be embraced by this expression (compare also D2).

4) Claim 1 is not novel (Art. 33(2) PCT), since D1 reveals Vismodegib (example 37) and solvates thereof (claim 1).

5) For the purpose of unity of invention its required to define a single general inventive concept which is shared by all subject-matter claimed. In the present case the problem to be solved may be regarded the provision of co-crystals with the aim of improving the dissolution kinetic profile (description, page 3, lines 13-15). Co-crystals (solvents) are known from D1. As a consequence the claimed subject-matter does not meet the requirements of 13.1 PCT. The applicant should also consider that the description is silent with respect to any experimental evidence supporting any improvement with respect to e.g. dissolution properties. Thus also the technical effect pertained by the applicant has not even been made credible for one single example, let alone the whole subject-matter claimed. From this it follows that also specific multi-component crystals as specified with claim 2 are not unitary.

6) The discussion of inventive step (Art. 33(3) PCT) will have to be postponed until novel and unitary claims are on file. It should already be noted that for any restricted subject-matter experimental evidence for a technical effect needs to be provided.
