Applicant RAYCHEM ELECTRONICS (SHANGHAI) LTD.

1. This opinion contains indications relating to the following items:

- Box No. I Basis of the opinion
- Box No. II Priority
- Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- Box No. IV Lack of unity of invention
- Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- Box No. VI Certain documents cited
- Box No. VII Certain defects in the international application
- Box No. VIII Certain observations on the international application

2. **FURTHER ACTION**

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/CN2016/087896

Box No. I Basis of this opinion

1. With regard to the **language**, this opinion has been established on the basis of:
 - the international application in the language in which it was filed
 - a translation of the international application into _____, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).
2. This opinion has been established taking into account the **rectification of an obvious mistake** authorized by or notified to this Authority under Rule 91 (Rule 43*bis*.1(a))
3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, this opinion has been established on the basis of a sequence listing filed or furnished:
 - a. (means)
 - on paper
 - in electronic form
 - b. (time)
 - in the international application as filed
 - together with the international application in electronic form
 - subsequently to this Authority for the purposes of search
4. In addition, in the case that more than one version or copy of a sequence listing has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
5. Additional comments:

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.

PCT/CN2016/087896

Box No. V	Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement		
1. Statement	Novelty (N)	Claims <u>1-28</u>	YES
		Claims <u>None</u>	NO
	Inventive step (IS)	Claims <u>1-28</u>	YES
		Claims <u>None</u>	NO
	Industrial applicability (IA)	Claims <u>1-28</u>	YES
		Claims <u>None</u>	NO
2. Citations and explanations:			
[1]	D1:	CN 103594215 A (19 February 2014)	
[2]	D2:	JP 2005183750 A (07 July 2005)	
[3]	D3:	JP 2003318008 A (07 November 2003)	
[4]	Novelty:		
[5]	D1 discloses a PTC composite material which comprises crystallinity high molecular polymers, TiC high conductivity nanoparticle powder of which a particle size is 1-50 nm, and TiC conductivity microparticle powder of which particle size is 0.1-10 µm; a weight ratio of the two types of particle powder is 0.1-1 : 9-9.9.		
[6]	D2 discloses a PTC composite material which comprises crystallinity high molecular polymers and two types of conductivity particles of difference particle sizes; wherein, an average particle size ratio between the big particle and

Box No. V

Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

the small particle is 1 : 0.5 - 1 : 0.75, and a volume ratio is 50 : 50 - 30 : 70.

[7] D3 discloses a polymer PTC composition which comprises crystallinity high molecular polymers, conductivity powder of which a particle size is 0.2-20 μm , and conductivity powder of which a particle size is 20-200 μm .

[8] None of above D1-D3 discloses that size distribution of the conductivity powder satisfies $20 > D_{100}/D_{50} > 6$. Accordingly, claims 1-28 of the present application are novel in the sense of PCT Article 33(2).

[9] Inventive Step:

[10] In the present application, super low resistivity can be obtained by using conductivity powder of wide size distribution ($20 > D_{100}/D_{50} > 6$). None of D1-D3 has the technical suggestion. Accordingly, claims 1-28 involve an inventive step in the sense of PCT Article 33(3).

[11] Industrial Applicability:

[12] The technical solutions of claims 1-28 of the present application can be used in the field of electrical component; therefore, claims 1-28 are industrially applicable in the sense of PCT Article 33(4).
