INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(Chapter I of the Patent Cooperation Treaty)

(PCT Rule 44bis)

Applicant's or agent's file reference MFP18070-PCT	FOR FURTHER ACTION		See item 4 below
International application No. PCT/JP2018/026880	International filing date (<i>day/month/year</i>) 18 July 2018 (18.07.2018)	Priority date (<i>day/month/year</i>) 28 March 2018 (28.03.2018)	
International Patent Classification (8th edition unless older edition indicated) See relevant information in Form PCT/ISA/237			
Applicant FURUKAWA ELECTRIC CO., LTD.			

<p>1. This international preliminary report on patentability (Chapter I) is issued by the International Bureau on behalf of the International Searching Authority under Rule 44 bis.1(a).</p> <p>2. This REPORT consists of a total of 5 sheets, including this cover sheet.</p> <p>In the attached sheets, any reference to the written opinion of the International Searching Authority should be read as a reference to the international preliminary report on patentability (Chapter I) instead.</p>																								
<p>3. This report contains indications relating to the following items:</p> <table> <tr> <td><input checked="" type="checkbox"/></td> <td>Box No. I</td> <td>Basis of the report</td> </tr> <tr> <td><input type="checkbox"/></td> <td>Box No. II</td> <td>Priority</td> </tr> <tr> <td><input type="checkbox"/></td> <td>Box No. III</td> <td>Non-establishment of opinion with regard to novelty, inventive step and industrial applicability</td> </tr> <tr> <td><input type="checkbox"/></td> <td>Box No. IV</td> <td>Lack of unity of invention</td> </tr> <tr> <td><input checked="" type="checkbox"/></td> <td>Box No. V</td> <td>Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement</td> </tr> <tr> <td><input type="checkbox"/></td> <td>Box No. VI</td> <td>Certain documents cited</td> </tr> <tr> <td><input type="checkbox"/></td> <td>Box No. VII</td> <td>Certain defects in the international application</td> </tr> <tr> <td><input type="checkbox"/></td> <td>Box No. VIII</td> <td>Certain observations on the international application</td> </tr> </table> <p>4. The International Bureau will communicate this report to designated Offices in accordance with Rules 44bis.3(c) and 93bis.1 but not, except where the applicant makes an express request under Article 23(2), before the expiration of 30 months from the priority date (Rule 44bis .2).</p>	<input checked="" type="checkbox"/>	Box No. I	Basis of the report	<input type="checkbox"/>	Box No. II	Priority	<input type="checkbox"/>	Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability	<input type="checkbox"/>	Box No. IV	Lack of unity of invention	<input checked="" type="checkbox"/>	Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement	<input type="checkbox"/>	Box No. VI	Certain documents cited	<input type="checkbox"/>	Box No. VII	Certain defects in the international application	<input type="checkbox"/>	Box No. VIII	Certain observations on the international application

Applicant
FURUKAWA ELECTRIC CO., LTD.

1. This opinion contains indications relating to the following items:

- Box No. I Basis of the opinion
- Box No. II Priority
- Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- Box No. IV Lack of unity of invention
- Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- Box No. VI Certain documents cited
- Box No. VII Certain defects in the international application
- Box No. VIII Certain observations on the international application

2. **FURTHER ACTION**

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

Document 1: JP 2012-174945 A (THE FURUKAWA ELECTRIC CO., LTD.) 10 September 2012, fig. 8, paragraphs [0049]-[0051], [0061]

The invention as in claims 1-3 does not involve an inventive step in the light of document 1 cited in the international search report. Document 1 describes a method in which a wafer bonded on a wafer processing tape 10 formed by laminating a substrate film 11, a pressure-sensitive adhesive layer 12 and an adhesive layer 13, in that order, is subjected to a blade dicing, laser dicing, or laser stealth dicing step, and thereafter, a hot air nozzle 29 is used to blow 50-90°C hot air onto an annular region 28 between a ring frame 20 and the region where the semiconductor chip C is present on the wafer processing tape, thermally contracting the substrate film 11 and exerting tension on the wafer processing tape 10. Further, the feature that the film is at least contracting is considered to indicate that the sum of the integral value of the thermal deformation rate in the MD direction of the wafer processing tape and the integral

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

value of the thermal deformation rate in the TD direction has a negative value.

Further, in the aforementioned tape, it would have been obvious to a person skilled in the art that in general it is difficult to imagine that the deformation rate resulting from heat reverses in the ranges 40-50°C and 80-90°C, in other words, that extreme variation is exhibited such that expansion shifts to contraction and contraction to expansion.

As such, in said wafer processing tape, the sum of the integral value calculated with the sum of the heat deformation ratio every 1°C between 40°C-80°C measured while the temperature is rising by a thermo-mechanical property testing device in the MD direction and the integral value calculated with the sum of the heat deformation ratio every 1°C between 40°C-80°C measured while the temperature is rising by a thermo-mechanical property testing device in the TD direction is a negative value.
