OF INTERNATIONAL SEARCH REPORT**

International application No.

PCT/CN2019/120734

The specific chemical compositions and structures of the "stable structures" in the claims have no clear definition. The description has not proved that with regard to any substances related to specific diseases or triggering the specific diseases, the design methods can be used for designing substances for the treatment and/or prevention of said diseases. Hence, the claims are not clear and are not sufficiently supported by the description, and therefore do not satisfy the criteria set out in PCT Article 6. A search for the claims can only be carried out within the scope substantially supported by the description, and the description is not clear about what substances can be used for said design methods. In other words, the description has not explained the invention in a manner sufficiently clear and complete, and the invention could not be implemented by a person skilled in the art. Hence, the description does not satisfy the criteria set out in PCT Article 5. Accordingly, no meaningful search can be performed.
