**International Bureau of WIPO**

**Response regarding The Written Opinion of ISA**

Ref.: International application No. PCT/RO2019/000032

**Amendments**

---

Please find below our response to ISA Written Opinion.

**Ref.: Item III:**

**Non-establishment of opinion with regard to novelty, inventive step and industrial applicability**

**Response:**

The opinion on novelty and inventive step was not established due to reasons indicated in the letter referring to the claims.

Following the opinions and studying the documents sent by ISA, we understand to amend the description as well as the claims. The claims are attached separately.

**Ref.: Item V:**

**Reasoned statement with regard to novelty, inventive step or industrial applicability; citation and explanations supporting such statement.**

Reference was made to the following documents:

D1 WO 2012/014245 A1 (KAZIAN MICHELE (IT); FOGLIO MARILENA (IT) ET AL.) 2 February 2012 92012-02-02)

D2 ES 2 235 666 A1 (TORRES PASTOR GUILLERMO (ES) 1 July 2005 (2005-07-01)

D3 DE 20 2006 011746 U1 (LANGENBACH GUIDO (DE) 6 December 2007 (2007-12-06)

D4 DE 195 05 999 A1 (WIEDERODER HERBERT (DE) 22 August 1996 (1996-08-22)

Taking into account the documents submitted to the SRI by IPEA, we consider necessary to amend the claims (presented separately).

Some material mistakes were found when claims was reformulated, so some corrections were also made, as follows:

1. Because position (7) is named either **motor**, or **special motor**, or **special engine**, it has been named **motor** everywhere.

2. At Claim 1, in the formula

$$\mathbf{Lmd + dep > hp+hb}$$

in both places where it appears, the following correction has been made

$$\mathbf{Lmd + dep > hpan+hb;}$$

3. At Claim 2,

**"lp length, hp height and gp"**

will be red

**"lpan length, hpan height and gpan"**

Everywhere in claim 2, **lp** is replaced by **lpan**, **hp** is replaced by **hpan** and **gp** is replaced by **gpan**.

4. At Claim 2, instead

"bound in the orifices on the upper part of the panel (15) whereas..."

will read

"bound in the orifices on the upper part of the panel (14) whereas..."

Yours sincerely,

Raul Sorin FANTANA
